

Asavie Device Control

Intelligent Management & Protection for the Mobile Enterprise

ASAVIE

MULTEFIRE®

Asavie

Asavie Moda is a software defined network as a service platform that manages the connectivity and security of your Internet of Things and mobility projects seamlessly across heterogeneous networks, at scale. You focus on the creation of applications for smart, connected products and we look after the friction-less, secure connectivity between your people and things.

Enterprise Device Control

By connecting applications and enforcing policies to run them where and when they need to, Asavie simplifies network connectivity and security challenges so companies can focus on innovating and optimizing their business service models. This enables enterprises to harness the power of the Internet of Things and mobile devices to transform and scale their businesses.

Remote Access

Enable employees to access work information, apps and systems from anywhere. The same office security policies can apply on any smartphones, tablets, and laptops.

Visibility & Control

Put an end to excessive web usage by setting policies for employees, restricting access to websites that use up valuable data and distract them from getting on with their jobs.

Security

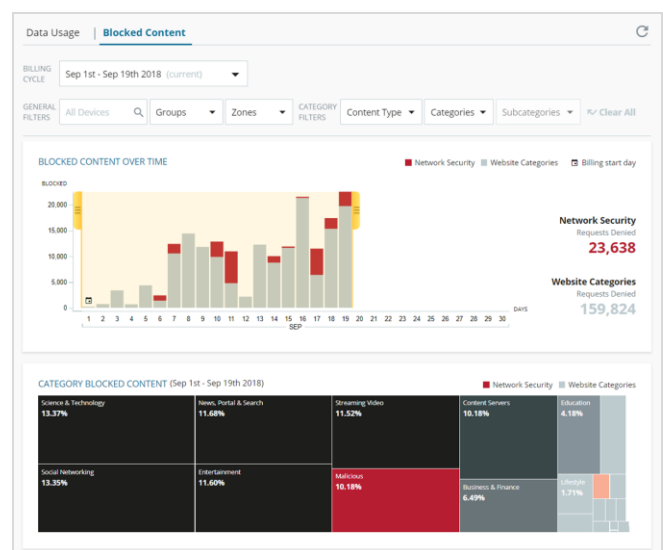

Keep your business information secure by accessing information over a private network. Protect against malicious attacks, detect and respond by remotely locating, locking and wiping from mobile devices.

Asavie Moda Advantages

Asavie Moda lets you set mobile data usage policies for employees, restricting access to websites that use up valuable data and distract them from getting on with their jobs and at the same time, providing access to the right applications to make employees productive on the go.

Control, Compliance, Productivity, Security

- Manage traffic over uLTE, Wifi, cellular networks
- Lock Down or wipe data on lost or stolen UE
- Restrict Device to business critical apps and data
- Increase productivity by managing how much mobile data staff use
- Protect devices from hackers, ransomware etc
- Block linking to malicious or inappropriate content
- Visibility into usage

Intelligent Management & Protection for the Mobile Enterprise

ASAVIE

MULTEFIRE®

Asavie Moda & uLTE/sXGP/Multefire

Asavie Moda addresses security concerns with uLTE networks no matter with enterprise UE or BYOD UE by ensuring device use is aligned with business objectives.

- Control
 - Create a customized fit-for-purpose mobile business experience. Control access to applications, content filtering & data usage monitoring to improve mobile efficiency.
- Compliance
 - Mobile data policy compliance capability for internal corporate policies & external industry regulations e.g. GDPR, HIPAA, SOX.
- Easy to Deploy
 - Device and OS agnostic, easy and fast to deploy, integrates out of the box with all UEM solutions (e.g. MS Intune, IBM MaaS360, VMware Airwatch) and scales with your business. Works on smartphones, tablets, MiFi cellular dongles, routers etc.
- Security
 - Moda augments MDM/UEM solutions by bringing the security policies into the network, providing real-time visibility, control and security for all data transit to and from the mobile devices
- Productivity
 - Ensure devices are used for intended work purposes to avoid lost productivity. Reduce the distraction of social media and streaming services.
- Insights
 - Network-layer based visibility into all your mobile data traffic for unparalleled threat alerting and usage-based analytics and insights.
